PERSONAL PROFILE

Driven Software Development student achieving First Class Honours standard, seeking to progress through a FIT Technology Apprenticeship. Combines strong technical skills in Astro, JavaScript, C#/.NET, SQL, Linux, and Git with real-world experience as a trilingual interpreter in high-pressure legal and public service environments. Proven self-starter with nationally recognised technical projects, including a featured portfolio website and practical automation tools. Highly motivated to apply technical ability, communication skills, and discipline in a full-time, industry-led apprenticeship setting.

KEY SKILLS

- **Applications:** Visual Studio/Visual Studio Code, UX/UI design of websites and apps in Figma, IBM Watson Studio, Microsoft Office Suite (Word, Excel, PowerPoint, Outlook, Access).
- **Programming Languages:** *Astro web framework*, HTML5, CSS3 (Bootstrap5, SASS), JavaScript (Node.js, Express.js, Handlebars.js), Bash scripting, T-SQL, C#/.NET/WPF, XML.
- **Operating Systems:** Windows 11, Linux (Ubuntu, Fedora, PopOS).
- **Database Systems:** SQL Server Management Studio.
- **Version Control Systems:** Git/Github — completed Github Foundations Certification.
- **Hosting (CI/CD) and Domain Configuration:** Vercel (for hosting and CI/CD), Cloudfare, Namecheap, Porkbun (for domain registration and configuration).
- **Artificial Intelligence:** Acquired practical Machine Learning skills through IBM AI Fundamentals with Capstone Project Certification.
- **Multilingualism and Legal Translation** as an Interpreter at Translit.
- **Languages:** Fluent English; Native Ukrainian and Russian.

EDUCATION AND TRAINING

Sep '24 – Present Atlantic Technological University Sligo / Ash Ln, Ballytivnan, Sligo, F91 YW50
Bachelor of Science (Honours) in Software Development, NFQ QQI L8

- *Web Design & Development, Client-Side Scripting, Introduction to Database Technology, OOP, Mathematics, Requirements Engineering*

Sep '13 – May '24 School №296 in Kyiv with deep learning of foreign languages

- **Leaving Certificate**

TECHNICAL PROJECTS

Personal Portfolio Website | valerkahere.com

Designed and developed a responsive, accessible portfolio using Astro (HTML, CSS, and vanilla JavaScript):

- *Recognised by Scrimba's official LinkedIn and Community newsletter as* "Portfolio of the Week" for its design and functionality.
- Used Git for version control and deployed the website via Vercel to a custom domain.
- Applied AI-assisted workflows to enhance debugging efficiency and improve overall code quality, resulting in reducing 500 lines of redundant CSS code.
- IBM AI Fundamentals culminated in a Capstone Project where I learned Prompt Engineering in-depth and applied my learnings throughout debugging process during the development of the website.

Automated Media File Sorter | Bash, ExifTool, Linux

Solved my own painpoint — authored a robust Bash script to automate the sorting of thousands of photos and videos into a structured DD/MM/YYYY directory format:

- Integrated ExifTool to extract and apply metadata for precise chronological sorting.
- Implemented user prompts and error-handling to ensure safe and reliable execution in a Unix-based command-line environment.

Object-Oriented Fleet Management System | C#, .NET

Developed a console-based application to manage a vehicle fleet, demonstrating solid understanding of object-oriented programming principles:

- Built class hierarchies using inheritance to represent standard and hybrid vehicles with distinct properties and behaviours.
- Designed logic to calculate journey feasibility and maximum fuel range using a List-based data structure for object management.

WORK EXPERIENCE

Sep '24 – Present Translit / Crescent House (4th floor), Hartstonge Street, Limerick, V94 K35Y
Irish language services company offering Translating and Interpretation.
Freelance Community Interpreter

- Deliver precise real-time interpretation (English, Ukrainian, Russian) in high-pressure legal and public service environments, demonstrating analytical thinking, accuracy, and professional communication.
- Translate complex information clearly while adhering to strict confidentiality and quality standards; achieved EF SET C2 (Proficient).

Feb '25 – Jul '25 Osta Cafe & Wine Bar / Garavogue Weir View, Stephen St, Rathquarter, Sligo
Front Of House (FOH)

- Independently managed full café operations in a fast-paced environment, demonstrating ownership, adaptability, and time management.
- Quickly learned and operated technical systems, showing strong problem-solving skills and attention to detail.

CERTIFICATIONS AND ADDITIONAL TRAINING

- **Innovation:** Contributed to and presented team solutions on Smart Trawling Systems for Low Carbon Footprint to industry experts during the IFTP Ireland 2025 innovation sprint.
- **Community & Leadership:** Supported peers on mental health issues as an ATU Togetherall Trained Peer and advocated for student accommodation on RTÉ, demonstrating leadership and social responsibility.

INTERESTS

- **UX/UI Design**: Strong interest in user-centred design; developed practical Figma skills through self-directed learning and created full light and dark theme website mock-ups for my personal portfolio, informed by Requirements Engineering principles.
- **Calisthenics & Learning Mindset**: Apply the principle of progressive overload from calisthenics to software development by iteratively improving skills, refactoring code, and tackling increasingly complex technical challenges.
